if we could solve all health problems?

"Vending machine is a great idea – these would be great in clubs and bars so people don't feel embarrassed going to busy shops and buying condoms. Would be great to see them about!"

"The vending machine is a brilliant idea, pure genius, I know I would definitely use it and so would my friends"

"Oh yeah – take condoms out of the toilets!"

"Medi+Vend seems a great idea to help young people have access to services privately which they might not want their GP to know, or are a bit shy about. Definitely an improvement on 40 years ago!"

medi+vend
