

CONTRACEPTION and SEXUAL health what do you think?

Did you get the help you needed?

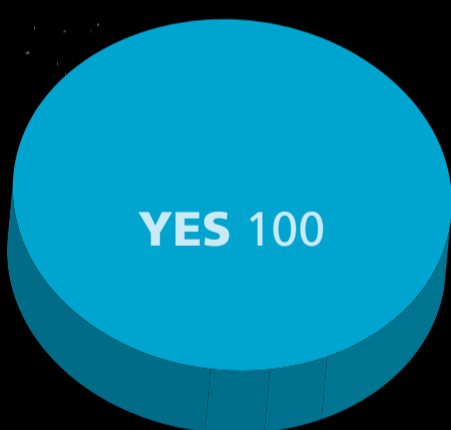

"Brilliant advice given on contraception, the procedure was carried out professionally and I felt comfortable throughout."

you said...
"Quicker waiting time"

"I enjoyed it and the staff today were amazing. I have never had so much care and support before."

Would you use the CaSH service again?

"I went to the GUM clinic at the LGI for STI testing. I asked whether I could get contraception there, however they said I would have to come to Citywise to get it. I spent all morning at GUM and then had to travel to Citywise. I suggest these services should be combined."

we did
"We will be having a touch screen triage system very soon and a condom vending machine – this will certainly speed up waiting times!"

"This sounds like a brilliant idea but unfortunately we are two separate services."

Are you happy that the service is confidential?

"I enjoyed every moment of my consultation, because I felt free with the doctor and the consultation had a friendly atmosphere."

"We have a specialist youth worker available every Wednesday and Thursday for advice and support."

"We had introduced a Medivend condom dispensing machine, which offers information and interactive games."
